## 1 INTRODUCTION TO SMEDA

Small and Medium Enterprise Development Authority (SMEDA) was established with the objective to provide fresh impetus to the economy through the launch of an aggressive SME support program.

Since its inception in October 1998, SMEDA had adopted a sectoral SME development approach. A few priority sectors were selected on the criterion of SME presence. In depth research was conducted and comprehensive development plans were formulated after identification of impediments and retardants. The all-encompassing sectoral development strategy involved recommending changes in regulatory environment by taking into consideration other important aspects including finance, marketing, technology and human resource development.

SMEDA has so far successfully formulated strategies for sectors including fruits and vegetables, marble and granite, gems and jewelry, marine fisheries, leather and footwear, textiles, surgical instruments, transport and dairy. Whereas the task of SME development at a broader scale still requires more coverage and enhanced reach in terms of SMEDA's areas of operation.

## 2 PURPOSE OF THE DOCUMENT

This particular pre-feasibility is regarding business of photo developing and printing, which comes under service sector. The objective of the pre-feasibility is primarily to provide potential entrepreneurs information on various aspects of the project including industry analysis, technical requirements, marketing, labor requirements and financial analysis.

#### 3 CRUCIAL FACTORS & STEPS IN DECISION MAKING FOR INVESTMENT

A SWOT Analysis is a strategic planning tool used to evaluate the *Strengths*, *Weaknesses*, *Opportunities*, and *Threats* involved in a project or business venture. Strengths and weaknesses are internal where as opportunities and threats originate from the external envoirnement. Following are major strengths, weaknesses, opportunities and threats of photo developing and printing business in Pakistan.

#### 3.1 Strengths

- Digital technology has Information-intensive applications.
- It provides quick turnaround.
- Easy availability of resources (technological, skilled human resource, raw material, infrastructure etc.)
- Availibility of low cost and user friendly cameras.
- Affordable development and printing of photographs.
- Fast developing and printing.

#### 3.2 Weakness

- With increase in use of digital cameras, consumers can now view theirs photos on PC by directly attaching their digital cameras with a computer.
- Machinery cost of a digital lab is much higher as compared to conventional labs.
- It is difficult to implement.
- Due to world recession, raw material prices has increased.

## 3.3 Opportunity

- New applications keep on coming due to innovation in technology.
- In future, digital cameras and their accessories can be placed in shop for selling purpose.
- Great potential, since there are not many (very few) digital photo development labs operating in Pakistan.
- Growing trend of photography in Pakistan.

#### 3.4 Threat

- Cost inhibits growth, so huge amount of money required for adaptation of new technology.
- Potential users may be unconvinced by advantages.

#### 4 PROJECT PROFILE

"Photography" is derived from the Greek words photos ("light") and graphein ("to draw") The word was first used by the scientist Sir John F.W. Herschel in 1839. It is a method of recording images by the action of light, or related radiation, on a sensitive material.

After introduction of user-friendly and affordable digital cameras, digital photography has become a popular phenomenon, world-wide. This pre-feasibility will facilitate to understand the newly emerging business of digital photo developing labs. In addition to the conventional services of developing and printing of negative rolls, this technology is enabling us to process photos from slides and digital media.

#### 4.1 Opportunity Rationale

Photography has emerged itself as a basic need of the day. Camera is being used more or less in every house in Pakistan and world over. It is the cheapest medium to save the moments of life. It is also the need/requirement of many big industries, like film, newspapers, advertising and fashion. Many experts see digital photo printing as the next wave in printing technology. The same consumer, who probably one or two years ago did not feel any need for digital printing is now far more interested. As a result there has been a tremendous increase in photo developing labs with digital technology in last few years.

#### 4.2 Project Brief

The photo printing and developing business comes under service sector and it provides variety of services like developing, printing, enlarging, framing, mounting of photographs and sale of cameras & photo accessories (i.e. flashes, film rolls, albums, camera batteries, camera bags etc.). Moreover a studio will also be established along with the shop and lab, where clients can have there snaps exposed.

## 4.3 Market Entry Timing

Demand for the digital labs is increasing at a rapid pace and there are very few currently operating in Pakistan. Therefore, it is advisable to enter this business at earliest. Moreover, photo labs can be established at any time of the year, all seasons are suitable for market entry but for more fast business earning it would be advisable to start business in wedding season.

## **4.4 Proposed Business Legal Status**

An enterprise can be a proprietorship or a partnership and even it can be registered under company law with Security and Exchange Commission of Pakistan. Selection totally depends upon the choice of the entrepreneur. Legal status recommended for this business type is sole proprietorship/partnership, as registering sole ownership requires less legal requirement. Similarly a lower income tax rate is applicable to sole proprietorship than that of any other form of companies.

## 4.5 Project Capacity and Rationale

The proposed digital lab has capacity to print 1180 prints (4"x 6") in one hour. Although shop will operate for eleven hours daily but the lab will only operate for eights hours (single shift) a day.

#### 4.6 Project Investment

Follow is the breakup of investment required for the project:

**Table 4-1: Investment breakup** 

| Sr.# | Description     | Rupees     |
|------|-----------------|------------|
| 1.   | Capital cost    | 9,917,500  |
| 2.   | Working Capital | 1,260,124  |
|      | Total           | 11,177,624 |

**Table 4-2: Recommended Project Parameters** 

| Capacity                  | Human<br>Resource | Technology/Machinery |    | Location     |  |
|---------------------------|-------------------|----------------------|----|--------------|--|
| 1180 prints (4"x 6")/hour | 9                 | Imported Machinery   |    | Metropolitan |  |
|                           | Financial Summary |                      |    |              |  |
| Project Cost              | IRR               | NPV                  | Pa | yback Period |  |
| 11.17M                    | 40.38%            | 10.6M                |    | 2.80 Years   |  |

## 4.7 Proposed Location

Location of unit is primary concern in this business. It should ideally be located near residential blocks of metropolitans, where majority population belongs to middle and/or higher income bracket. Other suitable location can be concentrated markets for photo labs and related arcades (e.g. Nisbat Road and Chamberlain Road in Lahore).

## 4.8 Key Success Factors/Practical Tips for Success

- Customer care, well in time service and maintaining good quality can ensure success
  of any business. Photo developing and printing is service based business where
  combination of good quality of product and exclusive service can play distinctive role
  in ultimate success of the business. Entrepreneur can be innovative in many ways to
  facilitate clients. Giving customer best value for his money is primary success factor
  for photo developing business.
- Photo-image processing is the most critical step in photography. The final images, or
  prints, that determine whether consumers continue to spend their discretionary
  income on photography are a direct result of the quality of photo/image processing.
  Regardless of the camera, film processing equipment, processing chemicals and
  photographic paper used." Photo-image processing will be the most critical step in
  keeping clients coming back.

## 4.9 Strategic Recommendations

## 4.9.1 Marketing

Regular and sustained marketing is required for a successful business of photo developing and printing. Few useful marketing and promotional tips are as under:

- Referral marketing is most suitable medium for promoting service sector businesses
  including photo developing and printing. Take care of your customers and they will
  promote your business through word of mouth.
- Know your customers' needs and design your product and services in accordance with their requirements.
- Provide "in time" service to customers. Timely delivery is a major consideration for the clients.
- Use promotional sales to increase traffic flow. This technique is useful to gain competitive edge over others.
- Local marketing channels like cable network advertisements and leaflets distribution can be used to increase traffic flow.

#### 4.9.2 Pricing

Following are the currently market prices charged for services being offered by photo printing and developing labs:

**Table 4-3: Developing** 

| Sr. # | Media Type | Service charges per roll |
|-------|------------|--------------------------|
| 1     | Film roll  | Rs. 20                   |

**Table 4-4: Scanning and Image Recording** 

| <b>Sr.</b> # | Media Type               | Service charges per roll |
|--------------|--------------------------|--------------------------|
| 1            | CD writing from negative | Rs. 150                  |

**Table 4-5: Printing** 

| Sr. # | Print                | Service charges per print (Rs.) |
|-------|----------------------|---------------------------------|
| 1     | Prints 4R (4"X6")    | 8                               |
| 2     | Prints 5R (5"X7")    | 10                              |
| 3     | Prints 6R (6"X8")    | 40                              |
| 4     | Prints 8R (8"X10")   | 80                              |
| 5     | Prints (8"X12")      | 90                              |
| 6     | Prints 10R (10"X12") | 100                             |
| 7     | Prints (10"X15")     | 120                             |
| 6     | Prints (12"X16")     | 200                             |
| 7     | Prints (12"X18")     | 225                             |
| 8     | Prints (12"X36")     | 400                             |

## 4.9.3 Product Packaging

Traditionally, negatives are placed in a plastic sheet (specifically made for the purpose) and presented to the client along with an album and the photographs in a printed envelop. Album, negative wallet and envelope are complimentary and client is not charged for them. Following are the current market prices at which lab will purchase above mentioned packing material:

**Table 4-6: Market Prices of Packing Material** 

| Sr. # | Item            | Purchase price per unit (Rs.) |
|-------|-----------------|-------------------------------|
| 1     | Album           | 4.80                          |
| 2     | Negative wallet | 1.0                           |
| 3     | Envelope        | 1.5                           |
|       | Total           | 7.3                           |

## 5 SECTOR & INDUSTRY ANALYSIS

## **5.1** Global Prospective

In this new era where the time is running fast, the Global market is also showing fast developing trends. People have turned from conventional methods to digital technology for better and faster results.

Market demand has lead to stronger digital intentions as the conventional methods are inflexible and produce static prints. Digital equipment increases the opportunity to expand services for all sizes of photo-finishing laboratories because it can process and print film and scan the images onto computer CDs or for use online. This trend increases the importance of connectivity between the imaging industry and the information technology industry.

Based on *InfoTrends report*<sup>1</sup>, it is revealed that;

- Worldwide revenue from low end (sub-\$1,000) digital camera sales is forecast to reach \$11.8 billion in 2007.
- Worldwide unit shipments of low end digital cameras will reach 24 million units in 2002, capturing 28% of total worldwide camera sales (not including one-time use cameras).
- Unit volume is forecast to grow at a compound annual growth rate of 16% to reach 51 million units in 2007.
- Digital camera sales are expected to experience a compounded annual growth rate of 15 percent over the next four years, reaching 82 million units by 2008.

Based on *IDC report*<sup>2</sup>, it is revealed that;

- Between 2005 and 2009, digital prints are expected to grow 26% annually, from 60 billion to 152 billion. And by 2009, digital print revenue could grow to \$107 billion (it's about \$38 billion currently). Best of all, at least from the industry's point of view, more than 55% of those prints will be created at a retail location.<sup>3</sup>
- Positive growth is expected in the consumer photofinishing market. Even though film usage will decline, the bright future of digital camera shipments will increase the number of images captured, shared and received.
- Digital camera images captured, shared and received worldwide will grow an average of 35% for 2003-2008.
- Digital cameras will continue to be the largest generator of digital images despite the greater forecasted proliferation of camera phones.
- Prints from digital images will surpass film prints in 2006 and will account for 71% of total worldwide prints by 2008.

## **5.3** Local Prospective

Photo printing business is emerging as one of the good business ventures in Pakistan. Pakistan is one of those countries where use of camera is gaining popularity, as it is the cheapest medium to save the moments of life.

Unfortunately neither is there any data available about the exact number of minilabs operating in Pakistan nor about their contribution to GDP. There are total 350<sup>5</sup> minilabs working in Pakistan (140 Fuji, 160 Konica, 30 Kodak, 20thers). Number of small photo studios exists mostly in unorganized sector which do not have minilab facility. There is an association of this industry operating under name of Pakistan Photofinishers Association. The head office is in Peshawar and Lahore zone office is located at 86 Chamberlain Road, Lahore. The cluster of this business in Lahore is at Chamberlain Road and Nisbat Road. According to an estimate there are around 150 minilabs in Lahore. Major players are:

- Konica (source LED)
- Fuji (source Laser)

#### 5.3.1 Major Industry Players of Lahore & surrounding areas

Following is the list of major players in the market of Lahore:

**Table 5-1: Major Industry Players** 

| Sr# | Name                       | Location                 |
|-----|----------------------------|--------------------------|
| 1   | Imperial Digital Color Lab | Chamberlain Road ,Lahore |
| 2   | Ikram Digital Color Lab    | Chamberlain Road, Lahore |
| 3   | Konica Express             | Liberty Gulberg, Lahore  |
| 4   | Amfahas                    | Liberty, Lahore          |
| 5   | AB Digital                 | Chamberlain Road, Lahore |
| 6   | Insta Digital Color Lab    | Garhishahu, Lahore       |
| 7   | Crown Digital Color Lab    | Shiekhupura              |
| 8   | Master Rana Color Lab      | Kasur                    |

<sup>&</sup>lt;sup>5</sup> Fuji, Head Office, Karachi

SMEDA

## 5.4 Legal Issues Regarding Industry

Photo printing business like any other business activity must be registered with income tax department and sales tax department. Prevailing rate of income tax for sole proprietorship is in various slabs max 25%. Rates are as follows:

**Table 5-2: Income Tax Brackets** 

| S/No | Taxable income   | Rate of tax |
|------|--|-------------|
| 1    | Where taxable income does not exceed Rs. 100,000                             | 0%          |
| 2    | Where taxable income exceeds Rs. 100,000 but does not exceed Rs. 110,000     | 0.50%       |
| 3    | Where taxable income exceeds Rs. 110,000 but does not exceed Rs. 125,000     | 1.00%       |
| 4    | Where taxable income exceeds Rs. 125,000 but does not exceed Rs. 150,000     | 2.00%       |
| 5    | Where taxable income exceeds Rs. 150,000 but does not exceed Rs. 175,000     | 3.00%       |
| 6    | Where taxable income exceeds Rs. 175,000 but does not exceed Rs. 200,000     | 4.00%       |
| 7    | Where taxable income exceeds Rs. 200,000 but does not exceed Rs. 300,000     | 5.00%       |
| 8    | Where taxable income exceeds Rs. 300,000 but does not exceed Rs. 400,000     | 7.50%       |
| 9    | Where taxable income exceeds Rs. 400,000 but does not exceed Rs. 500,000     | 10.00%      |
| 10   | Where taxable income exceeds Rs. 500,000 but does not exceed Rs. 600,000     | 12.50%      |
| 11   | Where taxable income exceeds Rs. 600,000 but does not exceed Rs. 800,000     | 15.00%      |
| 12   | Where taxable income exceeds Rs. 800,000 but does not exceed Rs. 10,00,000   | 17.50%      |
| 13   | Where taxable income exceeds Rs. 10,00,000 but does not exceed Rs. 13,00,000 | 21.00%      |
| 14   | Where taxable income exceeds Rs. 13,00,000                                   | 25.00%      |

Note: No tax shall be charged if the income of a woman taxpayer does not exceed Rs. 125,000

Where the taxable income, in a tax year, of a taxpayer aged 60 years or more on the first day of that tax year does not exceed 500,000 rupees, his tax liability on such income shall be reduced by 50%.

## 6 MARKET INFORMATION

#### 6.1 Market Potential

The market for photo developing and printing industry in Pakistan has been developing steadily over the years and a mushroom growth of minilabs has been observed in all the cities. Still a good potential is available for new labs, as population of big cities and use of digital camera are increasing day by day. Moreover there are very few digital photo processing labs operating in Pakistan, while their demand is rapidly raising

## **6.2** Target Customers

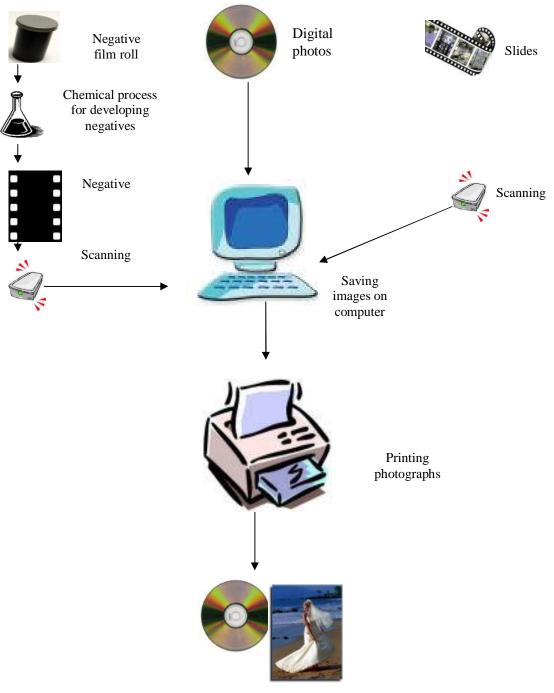

The customer of this industry can be categorized as follows:

- Retail customers
- Small photo studio owners not having minilabs
- News papers
- Professional photographers
- Surveyors etc

## 7 PRODUCTION PROCESS

## 7.1 Production Process Flow

Photographs are saved on CDs and presented to clients along with prints

## 7.1.1 Input photo film

- a. Film is accepted from customer
- b. Film passes through processor containing chemical baths.
- c. The negative is produced.
- d. Negative image is transferred to photographic paper
- e. Photographic paper passes through a series of chemical baths.
- f. Photographic prints are produced.
- g. Prints and negatives are assembled into final package
- h. Prints may be stored on any digital medium like CD, ZIP, FLOPPY etc
- i. Finished product is delivered to customer.

## 7.1.2 Input digital image

- a. Digital media like digital camera, CD etc is accepted from customer
- b. Digital image saved and forwarded to equipment.
- c. Digital image is transferred to photographic paper
- d. Photographic paper passes through a series of chemical baths.
- e. Photographic prints are produced.
- f. Prints are assembled into final package
- g. Finished product is delivered to customer.

#### 7.1.3 Input Slides

- a. Slide positive is accepted from customer
- b. Scanning of image from slide
- c. Digital image saved and forwarded to equipment.
- d. Digital image is transferred to photographic paper
- e. Photographic paper travels through a series of chemical baths.
- f. Photographic prints are produced.
- g. Prints are assembled into final package
- h. Digital image can also be stored on digital device like CD, ZIP or Floppy on clients request.
- i. Finished product is delivered to customer.

#### 7.2 Product Mix Offered

The Photo developing and printing unit will offer following broad categories of products and services to its customers:

- Photo developing and printing (digital input and film input)
- Photo enlargement (maximum 30"X 40")
- Sale of film rolls, albums, cameras, batteries and allied accessories
- Exposing Photos
- Framing and mounting
- High resolution scanning service
- CD writing of photos
- Digital processing and customizing photographs

## 7.3 Raw Material Requirement

The raw materials required for minilabs are:

## 7.3.1.1 Photographic paper

Photographic paper rolls are available in various sizes (length and width), most commonly used is of 610 feet x 6 inches and costs approximately Rs.4,600/-. This paper is sufficient to print 1830 prints or 51 rolls of 4"x6" size. Rates of various sizes of photographic papers are as follows:

Table 7-1: Prices of Photographic Paper

| Sr. # | Paper roll   | For print sizes  | Cost per roll |
|-------|--------------|------------------|---------------|
| 1     | 610 ft (6")  | 4"X6"            | Rs. 4,600     |
| 2     | 610 ft (5")  | 5"X7"            | Rs. 4,100     |
| 3     | 575 ft (6")  | 6"X8"            | Rs. 4,600     |
| 4     | 275 ft (8")  | 8"X10", 8"X12"   | Rs. 3,700     |
| 5     | 275 ft (10") | 10"X12", 10"X15" | Rs. 4,600     |

#### 7.3.1.2 *Chemicals*

There are two main types of chemicals used in the process, developing chemicals and printing chemicals. Chemicals required at developing stage are film developer, film bleach, film fixer, and film stabilizer and at printing stage are paper developer, paper bleach, and paper stabilizer.

Table 7-2: Prices of Chemicals available at FUJI

| Sr. # | Type                        | Quantity   | Cost per container |
|-------|-----------------------------|------------|--------------------|
| 1     | Developer Kit CP-47L, CP-43 | 2.5 liters | Rs. 733            |
| 2     | CP 49E, PCx2                | -          | Rs.3,375           |
| 3     | Bleach P-2R                 | 4 liters   | Rs. 1,561          |

It is difficult to calculate the consumption of these chemicals in quantitative terms. According to experts, average cost of chemicals consumed for printing and developing of a film roll of 36 snaps is as follow:

**Table 7-3: Cost of Chemicals (Approximate)** 

| Sr. # | Type                    | Cost per roll |
|-------|-------------------------|---------------|
| 1     | Chemicals at developing | Rs. 25        |
| 2     | Chemicals at printing   | Rs. 10        |
|       | Total                   | Rs. 35        |

The chemical process generates silver as waste. This wastage is sold at the rate of Rs. 25 to 35 per liter, depending upon the silver proportion in it. For the purpose of this feasibility wastage sale has been ignored in financials.

These raw materials are easily available in all the cities of Pakistan. Following are the major suppliers of machinery and raw material in Lahore and Karachi:

Table 7-4: Suppliers of Machinery and Raw Material

| <b>Sr.</b> # | <b>Company Name</b>      | Contacts   |
|--------------|--------------------------|--|
| 1            | FUJI FILM PAKISTAN       | 37D PECHS Karachi<br>Tel: 021-4535502.<br>West Pakistan Investment Ltd Building<br>Patiala Ground Lahore<br>Tel: 042-7237704-6 |
| 3            | EM-AEY ENTERPRISES (DNP) | Patiala Ground, Lahore   |
| 4            | KODAK                    | Bahria Complex M.T Khan Road, Karachi<br>Tel: 021-5610150<br>Empress Road, Lahore  |
| 5            | PPM CHEMICALS (PVT) LTD  | 1/1 Mission Road, Lahore<br>Tel: 042-7223693   |
| 6            | UNICOLOR                 | 42-Chamberlain Road, Lahore<br>Tel: 042-7226361  |

#### 7.4 Technology and Processes

#### 7.4.1 Technology/Process Options

Two main types of technologies are available these days:

- Conventional minilabs
- Digital minilabs

#### 7.4.2 Merits & demerits of these technologies

Conventional minilabs only take photo prints from film rolls, while digital minilabs allows photos to be produced on photo paper using digital technologies. Pictures can be manipulated in many ways before it is printed. Digital lab can print images from CDs, digital cameras, slide film and negative films. Besides printing, an image can also be copied to CDs and Floppy disks on customer's demand.

Digital minilabs are costly as compared to conventional minilabs. Digital technology was introduced in 1998. In Pakistan this technology arrived in year 2001. Digital minilabs with good market repute are Fuji 355, Konica R-1 Super, Kodak Noritsu 2901, Kodak Noritsu 3001, Fuji LP 7100 and Fuji LP 7500. These machines cost in range of Rs. 4.00 million to Rs. 9.00 million and have production capacity between 1,000 and 1,200 prints per hour.

Traditionally, the rates charged for digital prints are higher than that of conventional prints. Labs with digital technology are charging Rs. 8 for 4"x6" print as compared to Rs. 6 of conventional labs. Clients are willing to pay this extra premium for better quality prints of digital labs.

## 7.5 Machinery Requirement

Machine and equipment required for a digital photo developing and printing lab are listed as follow:

**Table 7-5: Machine and Equipment** 

| <b>Sr.</b> # | Description  | No. of<br>Units | Cost per unit | <b>Total cost</b> | Availability |
|--------------|--|-----------------|---------------|-------------------|--------------|
| 1.           | Minilab Fuji Frontier<br>LP7500  | 1               | 7,500,000     | 7,500,000         | Local        |
| 2.           | Film processor FP 560 B  | 1               | 1,000,000     | 1,000,000         | Local        |
| 3.           | Exposing studio equipment (Professional Camera, lights, backgrounds, stands etc) | 1               | 90,000        | 90,000            | Local        |
| 4.           | Split AC   | 2               | 35,000        | 70,000            | Local        |
| 5.           | Furniture/fixtures/glass work  |                 | 265,000       | 265,000           | Local        |
| 6.           | Computer   | 1               | 35,000        | 35,000            | Local        |
| 7.           | Scanner  | 1               | 7,500         | 7,500             | Local        |
| 8.           | Printer  | 1               | 15,000        | 15,000            | Local        |
| 9.           | Generator  | 1               | 780,000       | 780,000           | Local        |
|              | Total  |                 |               | 9,762,500         |              |

Major supplier of machinery used in processing and developing of photographs are listed under the caption "suppliers of machinery and raw material"

### 7.6 Machine Maintenance

Generally these machines require less but regular maintenance and cleanliness. Spare parts and after sale service is easily available in all the big cities. For this pre feasibility, the machine maintenance cost is assumed at 1% of machine cost.

## 8 LAND & BUILDING REQUIREMENT

## 8.1 Land Requirement

The proposed photo developing and printing unit requires an area of approximately 640 sq ft. It is recommended to start this business at rented premises rather at owned premises.

## 8.2 Covered Area Requirement

Following table gives detail of covered area requirementas for the lab:

**Table 8-1: Lab area requirements** 

| <b>Sr.</b> # | Description         | Sq ft. | Units | Area Sq ft |
|--------------|---------------------|--------|-------|------------|
| 1            | Lab                 | 126    | 1     | 126        |
| 2            | Studio              | 300    | 1     | 300        |
| 3            | Sales/customer area | 120    | 1     | 120        |
| 4            | Owner room          | 94     | 1     | 94         |
|              | Total               |        |       | 640        |

#### **8.3** Construction Cost

It is assumed that the renovation cost would be approximately Rs. 400 per sq ft. Total renovation cost of 640-sqft area will be Rs. 265,000/-

#### 8.4 Rent Cost

Building will be acquired on rent, will cost around Rs. 35,000 per month in recommended areas of Lahore. For the purpose of this feasibility it is assumed that a premise is rented on same.

## 8.5 Utilities Requirement

The necessary utilities are electricity and telephone. A three-phase commercial electricity connection is required. Current rate of electricity for these connections is Rs 11.00 per kilowatt-hour.

## 9 HUMAN RESOURCE REQUIREMENT

Skilled machine men are easily available at competitive salaries. Number of workers required for each department along with their salaries are given below:

**Table 9-1: Human Resource Description** 

| <b>Sr.</b> # | Positions          | No. of employees | Salary/month (Rs.) | Annual salary |
|--------------|--------------------|------------------|--------------------|---------------|
| 1            | Manager            | 1                | 25000              | 300,000       |
| 2            | Machine men        | 1                | 15,000             | 180,000       |
| 3            | Assistant operator | 1                | 10,000             | 120,000       |
| 4            | Cashier/Accountant | 1                | 8,000              | 96,000        |
| 5            | Helper             | 1                | 6,000              | 72,000        |
| 6            | Graphic designer   | 1                | 10,000             | 120,000       |
| 7            | Computer operator  | 1                | 8,000              | 96,000        |
| 8            | Security guard     | 2                | 8,000              | 192000        |
|              | Total              | 9                | 98,000             | 1,176,000     |

## 10 FINANCIAL ANALYSIS

## 11 KEY ASSUMPTIONS

## 11.1 Machinery Assumptions

| 11.1 Wachinery Assumptions  |          |
|---|----------|
| Capacity of minilab machine (Prints/Hour)                           | 1,180    |
| Capacity per day -(impressions) approximately                       | 8,000    |
| Repair and maintenance cost (% of equipment cost having growth 10%) | 1%       |
| Number of prints per roll   | 36       |
| 11.2 Operating Assumptions  |          |
| Hours operational per day   | 8 hours  |
| Days operational per month  | 25 days  |
| Days operational per year   | 300 days |
| No of shifts per day  | Single   |
| Annual capacity utilization for year 1                              | 40%      |
| Annual capacity utilization for year 2                              | 60%      |
| Annual growth in capacity utilization (year 3 onwards)              | 5% p.a.  |
| 11.3 Economy Related Assumptions                                    |          |
| Electricity cost growth rate  | 10%      |
| Salary growth rate  | 10%      |
| Rent growth rate  | 10%      |
| Markup rate on long-term loan                                       | 16%      |
| Raw material price growth rate                                      | 5%       |
| Revenue price growth rate   | 5%       |
| 11.4 Cash Flow Assumptions  |          |
| Accounts payable average  | 30 days  |
| Advance rent (period)   | 6 months |
| 11.5 Financials Assumptions   |          |
| Project life (Years)  | 10       |
| Debt  | 50%      |
| Equity  | 50%      |
|   |          |

Debt tenure (Years)

Debt payments per year

# 11.6 Operating Cost Assumptions

| Telephone Expenses (percentage of annual revenue)                 | 0.5% |
|---|------|
| Entertainment (percentage of annual revenue)                      | 0.5% |
| Amortization of deferred cost                                     | 20%  |
| Advertisement first year (percentage of annual revenue)           | 2%   |
| Advertisement year two and onwards (percentage of annual revenue) | 1%   |
| Traveling and conveyance (percentage of annual revenue)           | 0.5% |
| Printing and stationery (percentage of annual revenue)            | 0.5% |

# 11.7 Direct Cost Assumptions

| Chemical used in negative development   | Rs.25/roll  |
|---|-------------|
| Chemical used in printing   | Rs.10/roll  |
| Printing paper  | Rs.90/roll  |
| Packing charges   | Rs.7.5/roll |
| Enlargements (percentage of enlargement revenue)  | 60%         |
| Film roll, cameras, batteries and other accessories (percentage of accessories revenue) | 75%         |
| Studio/exposing (percentage of studio/exposing revenue)                                 | 50%         |
| Albums/framing (percentage of album/framing revenue)                                    | 75%         |
| Scanning, CD writing (percentage of scanning and CD writing revenue)                    | 50%         |

# 11.8 Revenue Assumptions

| Printing (4" x 6")  | Rs.245/roll |
|---|-------------|
| Film roll (negative) developing   | Rs.20/roll  |
| Revenue from enlargements (percentage of printing/developing revenue)             | 25%         |
| Revenue from film roll, cameras, etc. (percentage of printing/developing revenue) | 10%         |
| Revenue from Studio/exposing (percentage of printing/developing revenue)          | 10%         |
| Revenue from Albums/framing (percentage of printing/developing revenue)           | 5%          |
| Revenue from scanning, CD writing (percentage of printing/developing revenue)     | 4%          |
