

**Pre-feasibility Study** 

# RETAIL STORE FOR TIMBER PRODUCTS

August 2021

The figures and financial projections are approximate due to fluctuations in exchange rates, energy costs, and fuel prices etc. Users are advised to focus on understanding essential elements such as production processes and capacities, space, machinery, human resources, and raw material etc. requirements. Project investment, operating costs, andrevenues can change daily. For accurate financial calculations, utilize financial calculators on SMEDA's website and consult financial experts to stay current with market conditions.

#### 2 EXECUTIVE SUMMARY

Timber is the technical word used for wood; which has been a very important material in man's life since ancient times. Over centuries, the man has been using wood for variety of purposes; with its major uses being in buildings construction and furniture making. In addition, wood is also used as a fuel source. Timber is obtained by converting trees into beams, logs and planks. Construction sector represents the largest market of timber products.

This "Pre-feasibility Document" provides details for establishing a "Retail Store for Timber Products" business. The proposed retail store will also have a wood processing facility which will be used to process timber log into different timber products according to the customers' requirements. This project proposes to have three types of wood; including Kikar, Diyar and Rose wood (Sheesham). The proposed retail store can be located in any city of Pakistan. Larger to medium cities like Karachi, Sukkur, Hyderabad, Larkana, Lahore, Faisalabad, Multan, Gujrat, Chiniot, Quetta, Sibi, Jacobabad, Peshawar, Okara, Gilgit, Mardan, Muzaffarabad, Jhelum, Sahiwal, Muzaffargarh, Jhang, Bahawalpur, etc. are suitable locations for establishing this business.

The proposed retail store of timber products will sell timber obtained from Kikar Wood (Gum Arabic Tree), Diyar Wood and Rose Wood (Sheesham). In addition to wood logs/timber logs, the retail store will also sell waste wood cuttings and saw dust as its byproducts. The proposed retail store for timber products will primarily serve furniture manufacturers, construction industry and domestic households.

The proposed retail store is assumed to have a maximum capacity to sell 79,047 cubic feet of timber and 2,400,000 kg of wood By-product (waste wood cuttings to be used as fuel) and 72,000 kg of saw dust<sup>1</sup> during a year. During the 1<sup>st</sup> year of operations, it is assumed that the project will operate at 50% of its total capacity, which comes out to be 39,523 cubic feet of timber, 264,000 kg of waste wood (as fuel) and 36,000 kg of saw dust. The capacity utilization is assumed to increase at a rate of 5% per annum with a cap at 90% of total capacity.

The proposed project will be set up in a self-constructed building on a leased land having an area of 4,500 sq. ft. (1 Kanal). The project requires a total investment of PKR 13.76 million. This includes capital investment of PKR 3.52 million and working capital of PKR 13.759 million. The project will be established using 100% equity financing. The Net Present Value (NPV) of project is PKR 79.789 million with an Internal Rate of Return (IRR) of 60% and a Payback period of 2.64 years. Further, the proposed project is expected to generate Gross Annual Revenues of PKR 66.966 million in 1st year, Gross Profit (GP) ratio ranging from 12% to 32% and Net Profit (NP) ratio ranging from 6% to 20% during the projection period of ten years. The proposed project will achieve its estimated breakeven point at capacity of 18% (14,564 Cubic Feet) with gross revenue of PKR 24.677 million in a year.

<sup>&</sup>lt;sup>1</sup> Sawdust is dust and very small pieces of wood which are produced when wood is sawed.

The proposed project may also be established using leveraged financing. At 50% financing at a cost of KIBOR+3%, the proposed project provides Net Present Value (NPV) of PKR 91.59 million, Internal Rate of Return (IRR) of 60% and Payback period of 2.65 years. Further, this project is expected to generate Net Profit (NP) ratio ranging from 5% to 20% during the projection period of ten years. The proposed project will achieve its estimated breakeven point at capacity of 26% (20,612 Cubic Feet) with breakeven revenue of PKR 34.92 million.

The project will generate direct employment opportunity for 10 people. It is evident from the above financial figures, that the proposed Retail Store for Timber Products shows reasonable profitability and is economically and financially viable. The legal form of this project is proposed as "Sole Proprietorship".

#### 3 INTRODUCTION TO SMEDA

The Small and Medium Enterprises Development Authority (SMEDA) was established in October 1998 with the objective to provide fresh impetus to the economy through development of Small and Medium Enterprises (SMEs).

With a mission "to assist in employment generation and value addition to the national income, through development of the SME sector, by helping increase the number, scale and competitiveness of SMEs", SMEDA has carried out 'sectorial research' to identify policy, access to finance, business development services, strategic initiatives and institutional collaboration and networking initiatives.

Preparation and dissemination of prefeasibility studies in key areas of investment has been a successful hallmark of SME facilitation by SMEDA.

Concurrent to the prefeasibility studies, a broad spectrum of business development services is also offered to the SMEs by SMEDA. These services include identification of experts and consultants and delivery of need-based capacity building programs of different types in addition to business guidance through help desk services.

National Business Development Program for SMEs (NBDP) is a project of SMEDA, funded through Public Sector Development Program of Government of Pakistan.

The NBDP envisages provision of handholding support / business development services to SMEs to promote business startup, improvement of efficiencies in existing SME value chains to make them globally competitive and provide conducive business environment through evidence-based policy-assistance to the Government of Pakistan. The Project is objectively designed to support SMEDA's capacity of providing an effective handholding to SMEs. The proposed program aimed at facilitating around 314,000 SME beneficiaries over a period of five years.

#### 4 PURPOSE OF THE DOCUMENT

The objective of this pre-feasibility study is primarily to facilitate potential entrepreneurs in project identification for investment. The project pre-feasibility may

form the basis of an important investment decision and in order to serve this objective, the document/study covers various aspects of project concept development, start-up, and production, marketing, finance and business management.

The purpose of this document is to provide information to potential investors about establishing a business of "Retail Store for Timber Products". The document provides a general understanding of the business to facilitate the potential investor in crucial and effective investment decisions.

The need to come up with pre-feasibility reports for undocumented or minimally documented sectors attains greater imminence as the research that precedes such reports reveal certain thumb rules; best practices developed by existing enterprises by trial and error, and certain industrial norms that become a guiding source regarding various aspects of business setup and its successful management.

Apart from carefully studying the whole document, one must consider critical aspects provided later on, which form the basis of any investment decision.

#### 5 BRIEF DESCRIPTION OF PROJECT & PRODUCTS

The business model for the proposed retail store for timber products will be based on procuring raw timber logs from the market and processing those using horizontal band saw machine and vertical band saw machine. The processed peeled logs would be sold to the end customers after cutting them into wooden planks as per the length, width and thickness requirements of the customers. This project proposes to sell three types of wood which have high demand in the local market. These include Kikar Wood (Gum Arabic Tree), Diyar Wood and Rose Wood (Sheesham). The proposed retail store for timber products will also sell second grade wood and saw dust. Second grade wood mostly includes the outer bark of the cut tree logs and the waste wood cuttings obtained during the process of cutting wooden planks.

Kikar tree is native to Pakistan and is found in all around the country in Sindh, Punjab, Balochistan and Khyber Pakhtunkhwa provinces. This wood is used more commonly for making furniture, fencing and hedges and also used as a fire wood.

Diyar wood is obtained from the national tree of Pakistan (Deodar) and has an even texture, making an ideal type of wood for doors. In Pakistan it is found at high altitudes in Azad Kashmir, Murree Hills, Hazara, Swat, Dir, Tirah and Chitral. It is one of the most expensive woods in Pakistan and is mostly used in construction of doors in expensive houses, offices and other buildings.

Sheesham wood is highly durable, long-lasting and decay-resistant. Sheesham trees are found in many areas of Pakistan (Punjab, Khyber Pakhtunkhwa and Sindh). Sheesham wood furniture is very versatile and expensive. It is used for making doors, window frames, furniture and cabinets. The pulp of wood is also used for making paper.

Timber products retail store will sell timber of different sizes. Timber will be purchased in the shape of cut tree logs on weight basis (usually in kg or tons) from timber market or from forestry department. The processed timber will be sold on volume basis (usually in cubic feet) to retail stores and/or to end consumers. Depending upon the specific use of the wood by the customers, the timber products are available in the retail market in a variety of sizes. Length, width) and thickness, ranging from half an inch to 4 inches. Common types of timber products are shown in Table 1.

**Table 1 Common Types of Timber Products** 

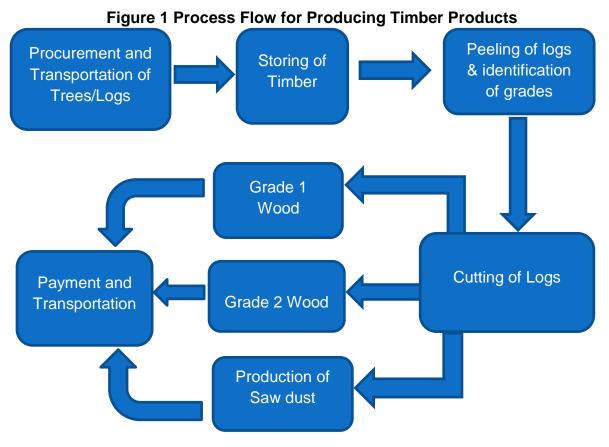

| Products  |   |  |  |  |
|-----------|---|--|--|--|
| Product 1 | Length 2 feet, Width 7-inch (2/7), Thickness (0.5-4 inches)   |  |  |  |
| Product 2 | Length 2 feet, Width 9-inch (2/9), Thickness (0.5-4 inches)   |  |  |  |
| Product 3 | Length 3 feet, Width 10-inch (3/10), Thickness (0.5-4 inches) |  |  |  |
| Product 4 | Length 5 feet, Width 10-inch (5/10), Thickness (0.5-4 inches) |  |  |  |
| Product 5 | Length 2 feet, Width 8-inch (2/8), Thickness (0.5-4 inches    |  |  |  |
| Product 6 | Length 2 feet, Width 10-inch (2/10), Thickness (0.5-4 inches) |  |  |  |
| Product 7 | Length 4 feet, Width 10-inch (4/10), Thickness (0.5-4 inches) |  |  |  |
| Product 8 | Length 6 feet, Width 10-inch (6/10), Thickness (0.5-4 inches) |  |  |  |

The list of timber products is not restricted to above standard sizes and the product specifications will vary from one retail store to another. This is due to the fact that specifications/sizes depend on the requirements of the retail store customers (furniture makers, construction sector, etc.).

It is due to this reason that the proposed retail store is not selling any product with fixed specifications. The retail store will sell timber from three types of wood as per the specifications required by the customers. Considering the fact that the retail store is selling its own purchased timber to customers, the retail store will not charge for the peeling and cutting processes. As per the market norm, the selling measurement unit of wood or timber will be in cubic feet and the selling measurement unit of grade-2 wood and saw dust will be in kilograms.

#### 5.1 Production Process Flow

The process of producing timber products from cut trees logs is shown in figure 1.

Brief description of process flow is as follows:

#### **Procurement and Transportation of Trees/Logs**

Timber logs of different sizes are procured in lots from the local timber market which are normally located in the outskirts of the cities. Other source of procuring these is the provincial forestry departments. The basis used for timber/logs procurement is kilograms/tons. The retail store staff need to ensure that the wood that is purchased from the market is already seasoned<sup>2</sup>, otherwise unseasoned wood will weigh more and unseasoned wood will also adversely affect the quality of the final product. Thus, only seasoned wood will be procured by the retail store. The procured timber logs are loaded on a truck for transportation to the store. The logs are unloaded and stacked into piles where these are kept for cutting. **Figure 2** shows the procured logs at the timber retail store.

Figure 2 Procured Logs

<sup>&</sup>lt;sup>2</sup> Seasoning is the process of drying timber to remove the bound moisture contained in walls of the wood cells to produce seasoned timber.

#### **Storing of Timber**

After procurement of logs, the retail store staff stores the timber of three types of trees separately. Timber must be stored horizontally and on a flat surface, so that the wood is exposed to air. The surface should be stable and evenly structured to prevent the timber from sinking in. The retail store will store timber in the "Open Area-For Lumber".

#### **Peeling of Logs**

The unloaded logs are peeled off using horizontal band saw machine (locally called *Aaraa* machine). Peeling helps to increase the longevity of wood. It helps in improving the condition of the wood to be used in other products. While peeling the wood, the staff will identify the grade 1 and grade 2 wood. Saw dust will also be produced during peeling process. Wood is peeled and kept in the form of large lumber. Some grade 2 wood will be identified and stored separately from grade 1 wood. Peeled logs will be stored in the processed wood store area. Figure 3 shows the machine used for peeling of logs.

Figure 3 Peeling of Logs by Horizontal Band Saw Machine

#### **Cutting of Logs**

As a customer approaches the retail store, the staff will select the required tree type (i.e., Sheesham, Diyar or Kikar) and cut the stored timber as per the size (length, width and thickness) requirement of the customer. Wood log is cut to obtain grade 1 wood. During this process, grade 2 wood and saw dust is also obtained as byproducts.

Grade 1 wood is of fine quality, which are sold to furniture manufacturers and construction sector. While grade 2 and saw dust is mostly used as a fuel for domestic use. Saw dust is also used in paper industry, furniture manufacturing and brick furnaces as fuel. The cutting process uses vertical band saw machine for cutting of peeled wood. Figure 4 shows the machine used for cutting of logs of timber.

**Figure 4 Vertical Band Saw Machine** 

#### **Grade 2 Wood**

Sometimes, wood logs are damaged from inside which is only discovered at the time of peeling. According to market research, on an average, 20%-25% of total purchase is grade 2 wood due to low quality wood and issues during cutting process. During cutting, small wood pieces are also produced which can only be used as fuel. This damaged wood is sold as byproduct in market and is called as grade 2 wood. For the purpose of this study, 22% of total processed wood in a year has been considered as damaged wood.

#### Saw Dust

Saw dust is produced during wood sawing process. According to market research, normally 3-5% of total processed wood is obtained as saw dust. Saw dust is normally required by furniture manufacturers for gluing the joints together. It is also used by carpenters in making furniture and gluing broken furniture. It is mixed with glue and pasted in the joint to make the hold strong. It is also used by the paper industry as raw material and by brick furnaces as fire.

#### **Payment and Transportation**

After cutting the logs as per customer's specifications, the payment process will proceed. Usually, the payment is made in cash but for reliable customers, credit facility is also provided for grade 1 product. The timber retail store will only provide delivery service for large orders and long-standing customers.

Grade 2 wood and saw is usually sold on cash and store does not provide delivery service for these products.

#### 5.2 Installed and Operational Capacities

The total annual installed capacity of the proposed retail store for timber products is 79,047 cubic feet of grade 1 timber, 528,000 kg of grade 2 wood (used for fuel) and 72,000 kg saw dust which is used in paper industry and furniture manufacturing. However, during the first year of operations, the store is expected to achieve 50% of its total installed capacity. The store would operate in a single shift of 8 hours per day. Based on 300 working days in a year, the retail store shall sell 39,523 cubic feet of timber and 264,000 kg of wood used for fuel and 36,000 kg saw dust during 1st year at 50% capacity.

Table 2 shows the installed and operational capacity of timber products retail store at 50% capacity.

Table 4 shows the product wise capacity of timber products retail store.

**Table 2 Installed and Operational Capacity** 

| Particulars          | Number of<br>Horizantal<br>Band Saw<br>Machine<br>(Aara<br>Machine) | Per Day<br>Capacity<br>(kg) | Max<br>Operational<br>Capacity Per<br>Year (kg) | Intial<br>Capacity per<br>Year @50% |
|----------------------|---|-----------------------------|---|-------------------------------------|
| Operational Capacity | 1   | 8,000                       | 2,400,000                                       | 1,200,000                           |

|-------------------------|-------|--------------|------------------|-------------------------------------|-----------------------------------|
| Kikar Wood              | 70%   | 1,260,000    | 23.588           | 53,417                              | 26,709                            |
| Diyar Wood              | 10%   | 180,000      | 16.339           | 11,017                              | 5,508                             |
| Rose Wood<br>(Sheesham) | 20%   | 360,000      | 24.636           | 14,613                              | 7,306                             |
| Grade 1 Wood*           |       | 1,800,000    |                  | 79,047                              | 39,523                            |

<sup>\*</sup>The wood procured and sold by the proposed project is divided between Kikar, Diyar and Rose Wood (Sheesham) in a proportion of 70%, 10% and 20% respectively.

**Table 5 By-Product Capacity** 

|                                     | 1461000             | y i reddet edpaerty   |  |
|-------------------------------------|---------------------|-----------------------|--|
| Product                             | By-Product<br>Ratio | Total Production (kg) | Intial Year<br>Production @50%<br>(kg) |
| Grade 2 Wood<br>(used as Fuel) (kg) | 22%                 | 528,000               | 264,000                                |
| Saw Dust (kg)                       | 3%                  | 72,000                | 36,000                                 |
| Total                               |                     | 600,000               | 300,000                                |

#### 6 CRITICAL FACTORS

The following factors should be taken into account while making the investment decision:

- Continuous knowledge of market linkages
- Good quality of products
- Consistent marketing of retail store
- Availability of skilled workforce
- Reliable storage facility for timber
- Procurement of seasoned wood

#### 7 GEOGRAPHICAL POTENTIAL FOR INVESTMENT

Two major users of lumber or timber are in construction industry and furniture manufacturing. A good quantity of wood is also used by general households as fuel. Therefore, the geographical potential for investing in the proposed Retail Store for Timber Products is in all the large to medium cities/towns; such as Karachi, Sukkur,

Hyderabad, Larkana, Lahore, Faisalabad, Gilgit, Multan, Gujrat, Chiniot, Muzaffarabad, Quetta, Sibi, Jacobabad, Peshawar, Okara, Mardan, Muzaffargarh, Jhelum, Bahawalnagar, Sahiwal, Jhang, Bahawalpur, etc. Any city/town with a medium to large population will be a feasible location to establish such a store. There is also a demand of firewood in smaller cities.

#### 8 POTENTIAL TARGET CUSTOMERS / MARKETS

The services provided by the proposed store will be mainly used by general public and the businesses such as furniture manufacturing and construction. The wooden furniture industry represents 95%³ of the total furniture market in the country. The leading furniture making districts of Pakistan are Chiniot, Gujrat, Peshawar, Lahore and Karachi. According to a report by Food and Agriculture Organization (FAO 2009), 68% of the Pakistan's population depends on firewood as a major source of household energy and about 100,000 people are involved in the fuel wood trade, generating about PKR 11.3 billion (US\$113 million) revenue annually. Construction industry is another major customer of timber which is currently growing at a high rate. In 2020, the construction industry contributed PKR 794 billion in the Gross Domestic Product (GDP) of Pakistan; and registered a growth of 8.1%. The growth in construction industry is expected to directly raise the demand for timber products.

The potential target customers of this business are listed below:

- Construction Industry
- Furniture manufacturers
- Domestic Households
- Manufacturer of wooden crates and boxes
- Village carpenters
- Plywood Manufacturers
- Sports goods manufacturers

Currently, there are multiple forms of timber businesses operating in the Pakistani market. Some businesses are working as retails stores which purchase wood from timber shops that are operating their own timber cutting machines. There are also timber stores which have their own cutting machines; and upon receiving customer orders, these stores cut timber as per the customer specifications. The types of wood proposed for the retail timber store is easily available in the local markets. There is no shortage of these wood, given the fact all these trees are available in abundant number in Pakistan.

#### 9 PROJECT COST SUMMARY

A detailed financial model has been developed to analyze the commercial viability of Retail Store for Timber Products. Various assumptions relevant to revenue and costs, along with the results of the analysis, are outlined in this section.

The projected Income Statement, Cash Flow Statement and Balance Sheet are attached as annexure of this document.

Project is proposed to be financed through 100% equity. Total project cost has been estimated to be PKR 13,758,566 which comprises of capital investment of PKR 3,584,400 and working capital of PKR 10,174,167.

#### 9.1 Initial Project Cost Estimates

Table 6 provides fixed and working capital requirements for establishment and operations of the retail store for timber products.

**Table 6 Initial Project Cost** 

| Cost Item                 | Cost (PKR) | Details Reference |
|---------------------------|------------|-------------------|
| Land                      | -          | 9.1.1             |
| Building / Infrastructure | 1,802,000  | 9.1.1             |
| Machinery & Equipment     | 850,000    | 9.1.3             |
| Office equipment          | 273,000    | 9.1.4             |
| Furniture & Fixtures      | 200,000    | 9.1.5             |
| Office vehicles           | 252,500    | 9.1.6             |
| Pre-operating costs       | 206,900    | 9.1.7             |
| Total Capital Cost        | 3,584,400  |                   |
| Working Capital           | 10,174,167 | 9.1.8             |
| Total Project Cost        | 13,758,566 |                   |

#### 9.1.1 Land

The proposed retail store for timber products will be established on a leased land. Suitable location for setting up of the unit like this can be easily found on lease. Therefore, no land cost has been added to the project cost. Total space requirement for the proposed manufacturing unit has been estimated as 4,500 sq. ft. (1Kanal).

Maximum production capacity of the proposed project would be 80,000 cubic feet. The proposed project would be maintaining 2 months of inventory which would be 13,333 cubic feet. Storage area for processed wood is 1,200 sq. feet and has wall height of 12 feet which can store around 14,000 cubic feet of wood.

The breakup of the space requirement is provided in Table 7.

**Table 7 Land Area Break-up** 

| Description           | % Break-Up | Area Sq. Ft. |
|-----------------------|------------|--------------|
| Office Area           | 5%         | 240          |
| Store-Processed Wood  | 27%        | 1,200        |
| Machine Area          | 36%        | 1,600        |
| Open Area -For Lumber | 31%        | 1,400        |
| Washrooms             | 1%         | 60           |
| Total                 | 100%       | 4,500        |

#### 9.1.2 Building

The proposed retail store for timber products will be established by constructing building on leased land. The building will include office area, storage for processed wood, machine area, open area for lumber and washrooms. The proposed store requires an estimated electricity load of 20-22 KW for which an electricity connection under the General Supply Tariff-Industrial three phase will be required. Cost of such electricity connection has been included in the capital cost.

Table 8 provides details of building cost. Table 9 shows the details of shed cost of machine area and

Table 11 shows the details of boundary wall.

**Table 8 Building Cost** 

|                   |                    | o o bunumg ooot                  |                               |
|-------------------|--------------------|----------------------------------|-------------------------------|
| Description       | Area (Sq.<br>Feet) | Construction Cost (PKR/Sq. Feet) | Total Construction Cost (PKR) |
| Office Area       | 240                | 2,500                            | 600,000                       |
| Washrooms         | 60                 | 2,500                            | 150,000                       |
| Boundary Wall     |                    |                                  | 428,000                       |
| Shed Cost         |                    |                                  | 560,000                       |
| Pillar Cost       |                    |                                  | 64,000                        |
| <b>Total Cost</b> |                    |                                  | 1,802,000                     |

Table 9 Precast Shed Cost for Machine and Store Area (2,800 Sq. Feet)

| Cost Item          | UOM  | Total Area | Cost per<br>Sq.feet (PKR) | Total Cost<br>(PKR) |
|--------------------|------|------------|---------------------------|---------------------|
| Precast Roof Cost* | Feet | 2,800      | 200                       | 560,000             |
| Total Cost         |      |            |                           | 560,000             |

\* Precast shed is built for store of processed wood and machine area. It reduces capital expenditure of the proposed project. It requires less time to build and dismantle.

| Laptop                       | 1   | 80,000             | 80,000              |
| Wi-Fi / Internet router      | 1   | 5,000              | 5,000               |
| Electronic Cash Register     | 1   | 30,000             | 30,000              |
| Total                        |     |                    | 273,000             |

## 9.1.5 Furniture and Fixture Requirement

Table 15 gives details of the furniture and fixture required for the project.

**Table 15 Furniture and Fixtures Requirement** 

| Cost Item                 | No. | Unit<br>Cost(PKR) | Total Cost<br>(PKR) |
|---------------------------|-----|-------------------|---------------------|
| Reception & Sales Counter | 1   | 40,000            | 40,000              |
| Owner Tables              | 1   | 30,000            | 30,000              |
| Owner Chairs              | 1   | 20,000            | 20,000              |
| Staff Chairs              | 4   | 10,000            | 40,000              |
| Sofa Sets                 | 2   | 35,000            | 70,000              |
| Total                     |     |                   | 200,000             |

#### 9.1.6 Vehicle Requirement

Details of vehicles required for the project is given in

Table 16.

**Table 16 Vehicle Requirement** 

| Cost Item          | No. | Unit Cost<br>(PKR) | Registration fee<br>@ 1% | Total Cost<br>(PKR) |
|--------------------|-----|--------------------|--------------------------|---------------------|
| Loader<br>Rickshaw | 1   | 250,000            | 2,500                    | 252,500             |
| Total Cost         |     |                    |                          | 252,500             |

# 9.1.7 Pre-Operating Cost Requirement

Details of pre operating cost required for the project is given in Table 17.

**Table 17 Pre-Operating Cost Requirement** 

| Staff                        | No. | Hiring Before<br>Year 0 (Months) | Unit Cost (PKR) | Total (PKR) |
|------------------------------|-----|----------------------------------|-----------------|-------------|
| Labour Skilled               | 2   | 1                                | 45,000          | 90,000      |
| Utilities Cost for One month |     |                                  | 116,900         | 116,900     |
| Total Cost                   |     |                                  |                 | 206,900     |

#### 9.1.8 Working Capital Requirement

Details of working capital required for the project are given in Table 18.

**Table 18 Working Capital Requirement** 

| Cost Item                          | No./ Month | Total Cost (PKR) |
|------------------------------------|------------|------------------|
| Equipment Spare Parts Inventory    | 1          | 14,167           |
| Consumables Material Inventory     | 2          | 8,800,000        |
| Upfront land rent                  | 1          | 360,000          |
| Cash                               |            | 1,000,000        |
| Total Initial Working Capital Cost |            | 10,174,167       |

#### 9.2 Breakeven Analysis

Table 19 shows calculation of break-even analysis.

**Table 19 Break-Even Analysis** 

| Description                        | Amount First Year (PKR) | Ratios |
|------------------------------------|-------------------------|--------|
| Sales (PKR)                        | 66,966,300              | 100%   |
| Variable Cost (PKR)                | 59,452,799              | 89%    |

| Breakeven Revenue (PKR)            | 24,619,847              |        |
| Contribution Margin Per Cubic Feet | 190                     |        |
| Breakeven Quantity (Cubic Feet)    | 14,530                  |        |
| Breakeven Capacity                 | 18%                     |        |

#### 9.3 Revenue Generation

Based on 60% capacity utilization, sales revenues, obtained by selling timber during the first year of operations are shown in Table 20**Error! Reference source not found.** 

**Table 20 Revenue Generation** 

|                                   | 1 4510 20 110                       | TOTICO CONTON                     |                                  |                  |
|-----------------------------------|-------------------------------------|-----------------------------------|----------------------------------|------------------|
| Product                           | Total<br>Production<br>(Cubic Feet) | Intial Year<br>Production<br>@50% | Price Per<br>cubic feet<br>(PKR) | Revenue<br>(PKR) |
| Kikar Wood (cubic feet)           | 53,417                              | 26,709                            | 700                              | 18,696,031       |
| Diyar Wood (cubic feet)           | 11,017                              | 5,508                             | 4,000                            | 22,033,450       |
| Rose Wood (Sheesham) (cubic feet) | 14,613                              | 7,306                             | 3,000                            | 21,919,484       |
| Total                             |                                     |                                   |                                  | 62,648,965       |

**Table 21 By-Product Revenue Generation** 

| By-Product        | Total<br>Production | Intial Year<br>Production<br>@50% | Price<br>Per kg<br>(PKR) | Revenue (PKR) |
|-------------------|---------------------|-----------------------------------|--------------------------|---------------|
| Grade 2 Wood (kg) | 528,000             | 264,000                           | 15                       | 3,960,000     |
| Saw Dust (kg)     | 72,000              | 36,000                            | 10                       | 360,000       |
| Total             |                     |                                   |                          | 4,320,000     |

#### 9.4 Variable Cost Estimate

Variable costs of the project have been provided in Table 22.

#### **Table 22 Variable Cost Estimate**

| Description of Costs       | Amount (PKR) |
|----------------------------|--------------|
| Raw Material Cost          | 52,800,000   |
| Transportation Cost        | 2,640,000    |
| Utilities Cost             | 842,799      |
| Direct Labor               | 2,580,000    |
| Machinery Maintenance Cost | 170,000      |
| Total (PKR)                | 59,032,799   |

#### **Table 23 Raw Material Cost**

| Product              | Cost per kg<br>(PKR) | Consumption (kg) | Total Cost<br>(PKR) |
|----------------------|----------------------|------------------|---------------------|
| Kikar Wood           | 20                   | 840,000          | 16,800,000          |
| Diyar Wood           | 150                  | 120,000          | 18,000,000          |
| Rose Wood (Sheesham) | 75                   | 240,000          | 18,000,000          |
| Total (PKR)          |                      | 1,200,000        | 52,800,000          |

# **Table 24 Transportation Cost**

| Particular          | Rate | Material Cost<br>(PKR) | Total Cost<br>(PKR) |
|---------------------|------|------------------------|---------------------|
| Transportation Cost | 5%   | 52,800,000             | 2,640,000           |
| Total (PKR)         |      |                        | 2,640,000           |

#### **Table 25 Direct Labor**

| Post                         | No of Personnel | Monthly Salary<br>(PKR) | Annual<br>Salary<br>(PKR) |
|------------------------------|-----------------|-------------------------|---------------------------|
| Labour-Skilled               | 2               | 45,000                  | 1,080,000                 |
| Labour-Unskilled             | 2               | 25,000                  | 600,000                   |
| Labour-<br>Loading/Unloading | 3               | 25,000                  | 900,000                   |

| Total (PKR) | 6 | 95,000 | 2,580,000 |
|-------------|---|--------|-----------|

# **Table 26 Machinery Maintenance Cost**

| Cost Item        | Rate | Machinery Cost (PKR) | Total Cost (PKR) |
|------------------|------|----------------------|------------------|
| Maintenance Cost | 20%  | 850,000              | 170,000          |
| Total (PKR)      |      |                      | 170,000          |

# **Table 27 Variable Cost Assumptions**

| Description of Costs   | Details                         |
|--|---------------------------------|
| Telephone expense  | 5% of Management staff expense  |
| Office vehicles running expense  | 20% of Management staff expense |
| Office expenses (stationery, entertainment, janitorial services, etc.) | 25% of Management staff expense |

#### 9.5 Fixed Cost Estimate

Table 28 shows the estimated fixed cost of the project.

**Table 28 Fixed Cost Estimate** 

| Description of Costs                | Amount (PKR) |
|-------------------------------------|--------------|
| Management Staff                    | 840,000      |
| Land rental expense                 | 1,440,000    |
| Depreciation expense                | 416,525      |
| Utilities                           | 30,798       |
| Amortization of pre-operating costs | 41,380       |
| Total                               | 2,768,703    |

**Table 29 Management Staff Salary** 

| Post               | No of personnel | Monthly<br>Salary (PKR) | Annual Salary<br>(PKR) |
|--------------------|-----------------|-------------------------|------------------------|
| Cashier/Supervisor | 1               | 30,000                  | 360,000                |
| Security Guard     | 2               | 20,000                  | 480,000                |
| Total              | 3               | 50,000                  | 840,000                |

**Table 30 Land Lease Rental Expense** 

| Cost Item   | Months | Monthly Expense (PKR) | Annually<br>Expense (PKR) |
|-------------|--------|-----------------------|---------------------------|
| Land Rental | 12     | 120,000               | 1,440,000                 |
| Total       |        |                       | 1,440,000                 |

**Table 31 Fixed Cost Assumptions** 

| Description of Costs | Details               |
|----------------------|-----------------------|
| Depreciation expense |                       |
| Building             | 10% of building cost  |
| Machinery            | 15% of machinery cost |
| Equipment            | 15% of equipment cost |

#### 9.6 Financial Feasibility Analysis

The financial feasibility analysis provides the information regarding projected Internal Rate of Return (IRR), Net Present Value (NPV) and Payback period of the study, which is shown in Table 32.

**Table 32 Financial Feasibility Analysis** 

| Description                | Project    |
|----------------------------|------------|
| IRR                        | 60%        |
| NPV (PKR)                  | 79,789,269 |
| Payback Period (years)     | 2.64       |
| Projection Years           | 10         |
| Discount rate used for NPV | 15%        |

#### 9.7 Financial Feasibility Analysis with 50% Debt

The financial feasibility analysis provides the information regarding projected IRR, NPV and payback period of the study on the basis of Debt: Equity Model (50:50), which is shown in Table 33.

Table 33 Financial Feasibility Analysis with 50% Debt

| Description            | Project    |
|------------------------|------------|
| IRR                    | 60%        |
| NPV (PKR)              | 91,591,191 |
| Payback Period (years) | 2.65       |

| Projection Years           | 10  |
|----------------------------|-----|
| Discount rate used for NPV | 13% |

#### 9.8 Human Resource Requirement

For the 1<sup>st</sup> year of operations, the Retail Store for Timber Products shall require the workforce at a salary cost shown in Table 34.

**Table 34 Human Resource Requirement** 

| Post                         | No. of Employees | Monthly Salary<br>(PKR) | Annual Salary<br>(PKR) |
|------------------------------|------------------|-------------------------|------------------------|
| Labour Skilled               | 2                | 45,000                  | 1,080,000              |
| Labour-Unskilled             | 2                | 25,000                  | 600,000                |
| Labour–<br>Loading/Unloading | 3                | 25,000                  | 900,000                |
| Cashier/Superviso r          | 1                | 30,000                  | 360,000                |
| Security Guard               | 2                | 20,000                  | 480,000                |
| Total                        | 10               |                         | 3,420,000              |

#### 10 CONTACT DETAILS

Names and contact details of some relevant suppliers are provided in Table 35.

**Table 35 Contact Details**

# 13 KEY ASSUMPTIONS

# 13.1 Operating Cost Assumptions

# **Table 37 Operating Cost Assumptions**

| Description                        | Details |
|------------------------------------|---------|
| Building depreciation              | 10%     |
| Furniture and fixture depreciation | 15%     |
| Vehicle depreciation               | 15%     |
| Office equipment depreciation      | 15%     |
| Inflation growth rate              | 10.1%   |
| Wage growth rate                   | 9.7%    |
| Electricity price growth rate      | 9.0%    |
| Office equipment price growth rate | 10%     |
| Office vehicle price growth rate   | 6.2%    |

# 13.2 Revenue Assumptions

# **Table 38 Revenue Assumptions**

| Description                       | Details |
|-----------------------------------|---------|
| Sale price growth rate            | 11.2%   |
| Initial year capacity utilization | 60%     |
| Capacity growth rate              | 10%     |
| Maximum capacity utilization      | 90%     |

## 13.3 Financial Assumptions

#### **Table 39 Financial Assumptions**

| Description                                 | Details |
|---|---------|
| Project life (Years)                        | 10      |
| Debt: Equity                                | 0:100   |
| Discount Rate (Used For Equity)             | 15%     |
| Discount Rate (Used For Debt: Equity 50:50) | 13%     |
