

Pre-feasibility Study

MAIZE SILAGE UNIT

May 2022

“The figures and financial projections are approximate due to fluctuations in exchange rates, energy costs, and fuel prices etc. Users are advised to focus on understanding essential elements such as production processes and capacities, space, machinery, human resources, and raw material etc. requirements. Project investment, operating costs, and revenues can change daily. For accurate financial calculations, utilize financial calculators on SMEDA’s website and consult financial experts to stay current with market conditions.”

1. DISCLAIMER

This information memorandum is to introduce the subject matter and provide a general idea and information on the said matter. Although, the material included in this document is based on data/information gathered from various reliable sources; however, it is based upon certain assumptions which may differ from case to case. The information has been provided on as is where is basis without any warranties or assertions as to the correctness or soundness thereof. Although, due care and diligence has been taken to compile this document, the contained information may vary due to any change in any of the concerned factors, and the actual results may differ substantially from the presented information. SMEDA, its employees or agents do not assume any liability for any financial or other loss resulting from this memorandum in consequence of undertaking this activity. The contained information does not preclude any further professional advice. The prospective user of this memorandum is encouraged to carry out additional diligence and gather any information which is necessary for making an informed decision; including taking professional advice from a qualified consultant/technical expert before taking any decision to act upon the information.

For more information on services offered by SMEDA, please contact our website: www.smeda.org.pk

2. EXECUTIVE SUMMARY

Maize Silage processing unit is proposed to be located at fodder sufficient areas with suitable land, water, and climatic conditions. These areas include, Jafferabad, and Lasbela (Baluchistan), Bannu, Charsada, D.I. Khan, Kohat, Mardan, Nowshehra, and Swabi (Khyber Pakhtunkhwa), Badin, Hyderabad, Mirpurkhas, Tando Adam, and Tando Jam (Sind), Arifwala, Bhurewala, Chiniot, Faisalabad, Khanewal, Multan, Melsi, Sahiwal, and Vehari (Punjab). Few areas of GB may also be considered for the project.

The proposed project will have the installed capacity of 10,800,000 Kg/ year but keeping in view the ground realities of Pakistan, the operation will start with a capacity of 60% (6,480,000 Kg/Year) and continue with the same.

The total Project Cost is **Rs. 6,598,632** including the Capital Cost of **Rs. 5,195,102** and the Working Capital of **Rs. 1,403,530**. Given the cost assumptions, Internal

Rate of Return (IRR) and payback are **65%** and **1.76** years respectively, hence making the project viable. The NPV @ 17% is **Rs. 19,437,003**.

The most critical consideration or factors for success of the project are:

- Location must have sufficient maize crop. It should preferably be an area with 10,000 tons, however with a minimum 6,000 tons of harvest area the machine will need to be moved to nearest area for capacity optimization.
- Availability of 03 phase electricity and tractor.
- Proximity of commercial dairy farms.

3. PURPOSE OF THE DOCUMENT

The objective of the pre-feasibility study is primarily to facilitate potential entrepreneurs in project identification for investment. The project pre-feasibility may form the basis of an important investment decision and in order to serve this objective, the document/study covers various aspects of project concept development, start-up, and production, marketing, finance and business management.

The purpose of this document is to facilitate potential investors in Tilapia Aquaculture by providing them with a general understanding of the business with the intention of supporting potential investors in crucial investment decisions.

The need to come up with pre-feasibility reports for undocumented or minimally documented sectors attains greater imminence as the research that precedes such reports reveal certain thumb rules; best practices developed by existing enterprises by trial and error, and certain industrial norms that become a guiding source regarding various aspects of business set-up and its successful management.

Apart from carefully studying the whole document one must consider critical aspects provided later on, which form basis of any Investment Decision.

4. INTRODUCTION TO SMEDA

The Small and Medium Enterprises Development Authority (SMEDA) was established in October 1998 with an objective to provide fresh impetus to the economy through development of Small and Medium Enterprises (SMEs).

With a mission "to assist in employment generation and value addition to the national income, through development of the SME sector, by helping increase the number, scale and competitiveness of SMEs", SMEDA has carried out 'sectoral research' to identify policy, access to finance, business development services, strategic initiatives and institutional collaboration and networking initiatives.

Preparation and dissemination of prefeasibility studies in key areas of investment has been a successful hallmark of SME facilitation by SMEDA.

Concurrent to the prefeasibility studies, a broad spectrum of business development services is also offered to the SMEs by SMEDA. These services include identification of experts and consultants and delivery of need based capacity building programs of different types in addition to business guidance through help desk services.

5. BRIEF DESCRIPTION OF PROJECT AND PRODUCT

The project is related to setting up Maize Silage Unit with following detail:

- **Technology:** This proposed unit will start with imported Single Row Maize Chopper and Baler. Generator may be added in case of unavailability of three phase electricity connection.
- **Location:** The unit may be located at areas having abundant maize crops and preferably nearest to dairy farms with availability of three phase electricity connection.
- **Product:** The farm will produce maize silage bales of 60 Kg weight per bale.
- **Target Market:** Dairy farms in the nearest areas of farm's location as well as other provinces.
- **Employment Generation:** The proposed project will initially provide direct employment to 04 persons. The indirect employment is at the time of maize harvesting season.
- **Profitability:** The Financial Analysis shows the unit to be profitable from the very first year of the operation.

5.1) Production Process Flow

Maize Harvesting

The single row maize chopper can harvest about 4 acres crop per day, provided it is being pulled by 70 hp tractor.

Inoculant Spray

Before loading on the maize bailer and wrapper, the maize is sprayed with inoculant for better preservation. A bottle costing Rs. 8,500 per pack is sufficient for treatment of 260 bales.

Making Bales

Silage is wrapped in shape of bales weighing 60 kg each. At this stage wrapping paper is required. This 10 Kg role costing Rs. 5,000/ can be used to wrap 55 bales. Similarly the cost of rope will be Rs. 0.2 per Kg of silage.

5.2) Installed and Operational Capacities

Thought the installed capacity of this machinery with 24 hours working and 06 Months season assumption is 12,960 tons per year but keeping in view the ground realities, the machine will operate a maximum of 12 hours a day. This report considers the maize season to be of 06 months, that is, from May to October. The farm will start with operational capacity producing 6,480 tons maize silage per year (50 bales per hour with weight of 60 Kg per bale) which is the optimum capacity as well.

6. CRITICAL FACTORS

The following factors should be considered thoroughly:

- Location must have sufficient maize crop. It should preferably be an area with 10,000 tons, however with a minimum 6,000 tons of harvest area the machine will need to be moved to nearest area for capacity optimization.
- Availability of 03 phase electricity and tractor.
- Proximity of commercial dairy farms.

7. GEOGRAPHICAL POTENTIAL FOR INVESTMENT

These areas include, Jafferabad, and Lasbela (Baluchistan), Bannu, Charsada, D.I. Khan, Kohat, Mardan, Nowshehra, and Swabi (Khyber Pakhtunkhwa), Badin, Hyderabad, Mirpurkhas, Tando Adam, and Tando Jam (Sind), Arifwala, Bhurewala, Chiniot, Faisalabad, Khanewal, Multan, Melsi, Sahiwal, and Vehari (Punjab). Though the maize production season in GB is limited to only September, but still this option may be considered for investment due to acute shortage of green fodder in the region.

8. POTENTIAL TARGET CUSTOMER/MARKETS

The product can be sold across Pakistan, especially within the areas having shortage of green fodder.

9. PROJECT COST SUMMARY

A detailed financial model has been developed to analyze the commercial viability of the Maize Silage Unit. Various cost and revenue related assumptions along with results of the analysis are outlined in this section.

9.1) Project Economics

All the figures in this financial model have been calculated for installed and operational capacity as mentioned in the above section.

The following table shows internal rates of return and payback period.

Table 1 - Project Economics

Description	Details
Internal Rate of Return (IRR)	65%
Payback Period	1.76 Years
Net Present Value (NPV)	Rs. Rs. 19,437,003

9.2) Project Financing

Following table provides details of the equity required and variables related to bank loan;

Table 2 - Project Financing

Description	Details
Total Equity (50%)	Rs. 3,299,316
Bank Loan (50%)	Rs. 3,299,316

9.3) Project Cost

Following requirements have been identified for operations of the proposed business.

Table 3: Project Cost

Description	Amount Rs.
Capital Cost	
Land (01 Kanal)	1,000,000
Infrastructure Development	1,250,000
Machinery and Equipment	2,810,000
Furniture and Fixtures	60,000
Office Equipment	25,500
Pre-operating Cost	50,000
Total Capital Cost	5,195,500
Working Capital	
Raw Material Inventory	813,608
Upfront Insurance Payment	140,500
Cash	450,000
Total Working Capital	1,403,530
Total Project Cost	6,598,632

9.4) Space Requirement

This proposed project may be established on 01 Kanal land acquired on ownership or lease. This study assumes own land for working.

Table 4: Space Requirement

Space Requirement (in Sq. ft.)	Rs/Unit	Units	Amount (Rs.)
Raw Material Dumping Place	100	600	60,000
Finished Goods Storage Space	100	600	60,000
Processing Shed	1,500	300	450,000
Admin Room	1,800	225	405,000
Washroom	1,000	50	50,000
Boundary Wall	-	-	150,000
Others	-	-	75,000
Total			1,250,000

9.5) Machinery and Equipment

Following table provides list of machinery and equipment. Costs may vary from area to area and underground water table.

Table 5: List of Machinery and Equipment

Space Requirement (in Sq. ft.)	Rs/Unit	Units	Amount (Rs.)
Single Row Maize Cutter	1,000,000	01	1,050,000
Baler	1,450,000	01	1,700,000
Miscellaneous Tools/Utensils		Lump Sum	60,000
Total			2,810,000

9.6) Furniture and Fixtures

Table 6: List of Furniture and Fixtures

Description	Units	Cost Rs/unit	Total (Rs.)
Cots	04	8,000	32,000
Fans	02	4,500	9,000
Others		Lumpsum	19,000
		Total	60,000

9.7) Office Equipment

Such type of project only requires a cell phone for communication. A smart cell capable of hosting social media apps worth **Rs. 25,500/** will be purchased.

9.8) Human Resource Requirement

Table 8: Payroll For Financial Analysis (Human Resource Requirements)

Description	No.	Monthly Salary/ Person (Rs.)	Months (No.)	First Year Salaries (Rs)
Owner	01	40,000	12	480,000
Labor (piece rate basis: Rs. 0.55 per Kg) Chopping: Rs. 0.2/Kg Packing: Rs. 0.25/Kg Loading: Rs. 0.1/Kg	04	N/A	N/A	3,564,000
Total Cost				4,044,000

9.9) Utilities and Other Costs (Raw Material and Other Expenses)

On the basis of 260 bales per bottle of inoculants about 415 bottles are required to suffice 108,000 bales for a total of 06 months. Similarly, as a single role of wrapping paper packs 55 bales, so, every year 1,962 roles are needed.

Table 6: Cost of Material

Item	Rs./Kg of Silage	Total Cost (Rs.)
Wrapping film	1.52	9,849,600
Rope	0.20	1,296,000
Inoculants	0.54	3,499,200
Total	2.26	14,644,800

The electricity charges are based on the assumption of baler operating for 12 hours a day, and 180 days per year. Rs. 388,800 per year will be the direct electricity charges (Rs. 0.6 per Kg of Silage).

Table 7: Miscellaneous

Description	Rs./Production Cycle
Machinery Maintenance	30,000
Travelling Expenses	70,000
Communication Expenses	12,000
Electricity	24,000
Total	136,000

9.10) Revenue Generation

The revenue stream is calculated on the basis of service charges against provision of maize chopper and baler to farmers. The maize chopper is rented out at Rs. 8,000 per acre where the production of maize is 20,000 kg per acre, so making the processing charges to be Rs. 0.4 per Kg. The charges of Bailer are Rs. 3.6 per Kg of maize silage.

Table 8: Revenue Generation

Product	Unit	Service Charges (Rs./Unit)	First Year Production	First Year Revenue (Rs)
Bale of 60 Kg	Kg	4	6,480,000	25,920,000
Total Revenue				25,920,000
